SURVIVAL CHECKLIST FOR RESOURCES AND SERVICES

BY CHRIST'S LIBRARY

Ask your library staff (in person or library@christs.cam.ac.uk)

to help you to familiarise with your available resources and services or direct you to relevant information. Some on the checklist are best answered by your Director of Studies, your assigned Tutor or Faculty/Departmental Library.

Timeline:

Most of the services and information relate to completing your assignments and meeting your course criteria. This also would serve as a refresher or additional information for services already used in passed academic years.

iDiscover Christ's library information page. Includes visual guides, iDiscover practice tests and links to other iDiscover related information. Upon request the library also offers iDiscover induction sessions for all its members

Christ's Library Overview information page. Includes all the information you need to make the best out of your library visit in person or remotely. In our services we offer copy, print and scan.

Guides to Resources per subject page. Alternatively have a look at the library page of your Faculty/Departmental Library for organised subject resources including databases.

Christ's Library Online Resources information page. Includes all the information and directed resources to exploring and understanding the eresources available for Cambridge users.

Reference style and Management information page. This link is a directory to your subject specific referencing style and any management tools available. Keep in mind that iDiscover includes reference management features.
